

PRESS RELEASE

Delta acquires WMS for AS/400

18th September 2009

Delta Software Limited, provider of the graphical, windows based warehouse management system DeltaWMS and associated services, is pleased to announce that as of the 18th of September 2009 it acquired the key assets of PLW Associates Limited, in particular the DWMS AS/400 warehouse management system and associated contracts.

DWMS is a high transaction radio frequency warehouse management system operating on the IBM AS/400 platform. DWMS is in operation in a number of large companies, and is the system of choice for Eddie Stobart's rapidly expanding warehouse operations throughout the UK.

Delta's Operations Director Lance Bennett says "The acquisition of DWMS is of strategic importance to Delta', it adds a number of premier customers to its user base and fills a technology gap for those users who demand the reliability and performance of the AS/400 platform. This places Delta in a very strong position within the UK market and strengthens the opportunity for European expansion. The acquisition of DWMS will enable Delta to continue its growth plans and capitalise on opportunities as the economy returns to better times."

Further information regarding Delta Software Ltd or the DeltaWMS product family may be found on www.deltawms.com
